

腎上腺之骨髓外造血在磁振造影上的影像表現：一病例報告

**MR imaging features of extramedullary
hematopoiesis in the adrenal gland**

摘要

骨髓外造血很少發生在腎上腺。據我們所知，腎上腺之骨髓外造血在磁振造影上的影像表現尚未被報告過。在此，我們報告一例腎上腺之骨髓外造血，表現為一右腎上腺大腫塊，及其在磁振造影上的影像特徵。

Abstract

The adrenal glands are rarely involved with extramedullary hematopoiesis (EMH). According to our own survey of the literature, magnetic resonance imaging (MRI) of adrenal EMH has not been reported. We herein report a case of adrenal EMH, presenting as a large right adrenal mass with the imaging features of MRI.
