摘要

外耳道珍珠瘤為耳鼻喉臨床少見病例。其成因尚未充分了解。我們報告一位 36 歲女性罹患外耳道珍珠瘤，高解像電腦斷層表現為外耳道腫瘤，以及鄰近的骨破壞，最初診斷懷疑外耳道惡性腫瘤。

Abstract

External auditory canal cholesteatoma is a rare disease entity. Here we present a case of external auditory canal cholesteatoma with adjacent bone destruction mimicking malignancy on high-resolution computed tomography. The final diagnoses is external auditory canal cholesteatoma
