## Abstracts of Speakers

	Page
<b><u>SESSION 1: REPRODUCTIVE ENDOCRINOLOGY</u></b>	
<b>S1-1</b> Discovery of new reproductive hormones and receptors in the postgenomic era <i>Aaron.J.W Hsueh (U.S.A)</i>	1
<b>S1-2</b> Sex steroids and atherosclerosis: from the laboratory to the clinic <i>Gautam Chaudhuri (U.S.A)</i>	2
<b>S1-3</b> Multi-faceted role of GnRH-I and GnRH-II in reproduction <i>Peter C.K Leung (Canada)</i>	4
<b><u>SESSION 2: IMMUNOLOGY OF REPRODUCTION</u></b>	
<b>S2-1</b> Cytokine and Endometriosis <i>Hong-Nerng Ho (Taiwan)</i>	5
<b>S2-2</b> The craft of ART: infertility strategies in 2002 and 2022 <i>Gerald Schatten (U.S.A)</i>	6
<b>S2-3</b> Auto-immune mechanism on recurrent pregnancy loss <i>Tsunehisa Makino (Japan)</i>	7
<b><u>SPECIAL LECTURES (SPONSORED BY ORGANON)</u></b>	
<b>SL-1</b> Convenience and individualisation in ART <i>Bernard Hedon (France)</i>	9
<b>SL-2</b> Effects of rec-FSH (Puregon®) on follicular environment in controlled ovarian hyperstimulation (COH) cycles <i>Doo-Seok Choi (Korea)</i>	10
<b><u>SESSION 3: STEM CELLS, CLONING AND EMBRYONIC DEVELOPMENT</u></b>	
<b>S3-1</b> Sperm as a vector for gene transfer – testis mediated gene transfer <i>Harumi Kubo (Japan)</i>	11
<b>S3-2</b> Isolation, differentiation and in vivo application of pluripotent stem cells <i>Jihwan Song (Korea)</i>	13
<b>S3-3</b> Improving the success of ART and reducing multiple pregnancies through a microdroplet-egg and embryo staging-extended culture/transfer protocol <i>Ariff Bongso (Singapore)</i>	15

	Page
<b><u>SESSION 4: IMPLANTATION</u></b>	
<b>S4-1 Human implantation in view of dual regulation by endocrine immune systems</b>	16
<i>Takahide Mori (Japan)</i>	
<b>S4-2 Endometrial receptivity and ovarian stimulation</b>	17
<i>Pak-Chung Ho (Hong Kong)</i>	
<b>S4-3 Interleukins in embryo implantation</b>	22
<i>Hong-Yuan Huang (Taiwan)</i>	
<b><u>SESSION 5: NEW MILLENNIUM TECHNIQUES (I)</u></b>	
<b>S5-1 Ultra-rapid vitrification using cryoloop technique for human blastocyst cryopreservation</b>	24
<i>Tetsunori Mukaida (Japan)</i>	
<b>S5-2 Mitochondria transfer</b>	27
<i>Chii-Ruey Tzeng (Taiwan)</i>	
<b>S5-3 Rejuvenescent of defective oocytes from age-related infertile females by ooplasm replacement using nuclear transfer</b>	28
<i>Osamu Kato (Japan)</i>	
<b>S5-4 The role of endoscopy in reproductive conservative surgery</b>	29
<i>Chyi-Long Lee (Taiwan)</i>	
<b><u>SESSION 6: NEW MILLENNIUM TECHNIQUES (II)</u></b>	
<b>S6-1 Androgens and androgen receptor in male fertility</b>	30
<i>Chawnschang Chang (U.S.A)</i>	
<b>S6-2 cDNA microarray</b>	31
<i>Huei-Wen Chen (Taiwan)</i>	
<b>S6-3 Single blastomere culture for PGD and/or derivation of ES cells</b>	32
<i>Harumi Kubo (Japan)</i>	
<b>S6-4 The prospect of multi-purpose single cell genetic analysis using whole genome amplification and comparative genomic hybridization</b>	34
<i>Sheng Chiang (Taiwan)</i>	
<b><u>SESSION 7: CLINICAL PROBLEMS IN INFERTILITY AND ART</u></b>	
<b>S7-1 Some basic and clinical problem in infertility and ART</b>	35
<i>Shuetu Suzuki (Japan)</i>	
<b>S7-2 The three entities, peritoneal, ovarian and rectovaginal and their relationship with infertility</b>	37
<i>Jacques Donnez (Belgium)</i>	

	Page
<b>S7-3 Emerging role of angiogenesis in reproduction</b>	<b>38</b>
<i>Yuji Taketani (Japan)</i>	

**SESSION 8: CLINICAL PROBLEMS IN INFERTILITY AND ART**  
**(SPONSORED BY SERONO)**

<b>S8-1 Oocyte freezing</b>	<b>39</b>
<i>Kwang-Yul Cha (Korea)</i>	
<b>S8-2 The role of LH during controlled ovarian hyperstimulation in assisted reproductive technology</b>	<b>41</b>
<i>Shin Yong Moon (Korea)</i>	
<b>S8-3 A successful standardised and personalised ART programme at the National University Hospital, Singapore</b>	<b>50</b>
<i>P. C. Wong (Singapore)</i>
