

臺北醫學大學九十學年度研究所碩士班招生考試題目卷

科目：藥物治療學

九十學年度研究所碩士班招生筆試
所別：藥研
考科：藥物治療學

題目試卷共 / 張，本試卷為第 / 張

1. Please explain the meanings of Trough/Peak Ratio of cardiovascular agents and its application. (10%)
2. Please give examples and explain the meanings of the three pharmacodynamic properties of antimicrobial agents and their clinical application. (Hints: concentration-dependant bactericidal activity, concentration-independant bactericidal activity, and post-antibiotic effect) (30%)
3. Please give five examples of national or international pharmacy practice-related organizations or societies. (Be sure to write down the full correct titles) (10%)
4. The table below is cited from "CA Pedersen, PJ Schneider, JP Santell, and EJ Kelly, ASHP national survey of pharmacy practice in acute care settings: monitoring, patient education, and wellness- 2000, AJHP 57(23):2171-87." Please explain the meanings and results in this table. (20%)

Table 4.

Activities Implemented To Improve Medication Therapy Monitoring

Characteristic	n	% Respondents										
		Increased Hiring of Clinical Pharmacists	Implemented Satellite Pharmacies	Implemented Electronic Physician Order Entry	Implemented Automated Dispensing System	Redeployed Pharmacists to Patient Care Units	Implemented Decentralized Pharmacist Order Entry	Expanded Pharmacy Technician Responsibilities	Increased Access to Patient-Specific Data	Demonstrated Impact of Clinical Pharmacy Services	None of These	
All hospitals Occupied beds	519	24.1	7.9	5.2	29.5	26.0	15.8	53.2	37.6	44.5	15.0	5.6

* $\chi^2 = 12.1$, d.f. = 5, p = 0.034.

^bMSA = metropolitan statistical area.

* $\chi^2 = 5.7$, d.f. = 1, p = 0.017.

* $\chi^2 = 4.8$, d.f. = 1, p = 0.028.

* $\chi^2 = 5.2$, d.f. = 1, p = 0.023.

* $\chi^2 = 9.1$, d.f. = 1, p = 0.003.

* $\chi^2 = 4.1$, d.f. = 1, p = 0.044.

5. Please describe and explain the control measures of the classification system of controlled substance in Taiwan and give one example for each classification. (10%)

6. Please write down the brand/generic name, pharmacology/mechanism of action, clinical indication, precautions or potential drug interactions of the following new agents. (20%)

- (1) Orlistat
- (2) Atovastatin
- (3) Mifepristone
- (4) Linezolid
- (5) Rofecoxib
- (6) Neurontin®
- (7) Fexofenadine
- (8) Avandia®
- (9) Amaryl®
- (10) Montelukast
