

許東榮教授研究論文目錄

- (1) Studies on Hinokitiol XI. Iodo-Hinokitiol
Tetsuo Nozoe, Eigai Sebe, Tong-Jung Hsu
The faculty of Science, Tohoku University Dec. 1952
Chemical Review 55 No. 1 (1955) p.25, 56.
- (2) Studies on the Cooling water
Jurnal of Taiwan power Engineering vol. 109 Sep. p. 6,
(1957).
- (3) Studies on treatment of condensate and feed water line by the
use of ammonia.
Journal of Taiwan power Engineering vol. 110 Oct. p. 5,
(1957).
- (4) Studies on the treatment of microbes with chlorine in the
recirculating sea water in Nan-Pu steam power station.
Journal of Taiwan power Engineering vol. 119 July p. 10,
(1958).
- (5) Studies on the treatment of microbes with bleaching powder
sol. in the recirculating sea water in Shen-Ao steam power
station.
Journal of Taiwan power Engineering vol. 180 Oct. p. 15,
(1963).
- (6) Studies on the treatment of condensate and feed water line
by the use of morpholine.
Journal of Taiwan power Engineering vol. 1208 Dec. p. 13,
(1965).

- (7) Studies on the alkali corrosion.
Taiwan power Chemistry March p. 64, (1966).
- (8) Studies on the water treatment for 1, 800 p.s.i. class boiler.
Taiwan power Chemistry March p. 69, (1966).
- (9) Studies on the detection of condenser leakage and boiler water
Carry-over.
Taiwan power Chemistry March p. 74, (1966).
- (10) Studies on the removal of arsenic in well water.
J. of Japanese industrial water. vol. 123, p. 21, (1968).
- (11) Studies on elimination of silica from the Sia-Tan-Swi river.
J. of Japanese industrial water. vol. 166, p. 28 (1972).
- (12) Coagulation treatment of the Keelung river water.
J. of Japanese industrial water, vol. 167, p. 30 (1972).
- (13) Study of contamination in water sources of the Hsin-Tien river.
J. of Formosan Medical Association. vol. 71, No. 7, p. 467
-468, July 28, (1972).
- (14) Ligand-exchange chromatography of Aziridines and Ethanol Amines.
Analytical Chemistry. vol. 45, p. 501, March (1973).
- (15) Liquid Chromatography of Analgesic Drugs of Ion-Exchange Resins.
Analytical Chemistry. col. 45, p. 2306, December (1973).
- (16) Studies on the Arsenical compounds in well water.
J. of Japanese industrial water. vol. 199, p. 20, (1975).

- (17) Studies on the ion exchange separation of Aspirin, Salicylic acid, and Acetic acid.
J. of the Chinese Chem. Soc., 23 17-21 (1976).
- (18) Liquid Chromatograph of Adenine, Caffeine, Theobromine, Theophylline, Tannicoacid, Xanthine and its application on tea analysis.
J. of the Chem. Soc., 25 153 (1978).
- (19) Liquid Chromatography Of benzoic acid and phthalic acid on ion exchange resin.
J. of the Chinese Chem. Soc., 25 219-223 (1978).
- (20) Studies on the recovery of chromic acid in electroplating wastes with ion exchange resins.
Chinese environmental protection, vol. 2 1-20 (1978).
- (21) Studies on the defluoridation of water with ion exchange resins.
Chemistry, No. 3, p. 89 (1977).
- (22) Liquid Chromatography of Aspirin, Salicylic Acid and Acetic Acid on Cation Exchange Resin.
J. of the Chinese Chem. Soc., 26 21-24 (1979).
- (23) Study on removal and recovery of divalent mercury in waste water with strongly acidic cation exchange resin.
Chinese environmental protection. p1-7 vol. 5, No. 1 (1982).

- (24) Studies on the ion exchange chromatographic separation of L-Ascorbic acid and oxalic acid.
J. of the Chinese Chem. Soc., 29, p. 93-98, (1982).
- (25) Studies on the recovery of nickel in electroplating wastes with ion exchange.
Chinese environmental protection p. 17-25, No. 3, vol 5 (1982).
- (26) Studies on the relation between mossmortality of hard clams (Meretix Iusoria) and environmental factors at Hsinchu coast.
Chinese environmental protection p27-48, No. 3, vol. 5 (1982).
- (27) Heavy metals and Organics contamination survey of Oysters in Hsin-chu Mussel Cultural area.
J. of the chinese Nutrition vol 7 p1-14, (1982).
- (28) Study on the removal and recovery of mercury with strongly acidic cation exchange resin.
Chinese environmental protection p1-6, vol. 6, No.2 (1983).
- (29) Pilot test of the recovery of chromate in electroplating wastes with ion exchange resin.
Chinese environmental protection p15-21 (1984).
