Calibration Measurement is Important to Assess a Medical Decision Model
Ophthalmology

Dear Dr. Chiu,

I am pleased to tell you that your Letter to the Editor entitled, "Calibration Measurement is Important to Assess a Medical Decision Model," submitted on Dec 14, 2005, has now been accepted for publication in Ophthalmology.

The manuscript will be forwarded to our publisher. You are no longer able to use the electronic submission system to check on the status of this manuscript. Instructions to assist you through the publishing process will be forwarded to you directly from the publisher.

Page proofs will be emailed to you from the publisher. Please give these your careful attention for accuracy; it is the responsibility of the author to note any typographical errors or word alterations on these page proofs.

It is the corresponding author's responsibility to advise the Editorial Office of any change in contact information, most specifically your e-mail address.

Thank you for submitting your work to this journal.

With kind regards

Anika Trahan
