HAP1 and Htt in trafficking

Salinas S et al, *Curr Opin Cell Biol* 2008

Name	Function	References
Huntingtin	Scaffold protein ^c	1995
P150Glued	Microtubule-dependent transporter	1997, 1998
Rho-GEF Kalirin-7 (Duo)	GDP-GTP exchange factor	1997
Hrs	Vesicular trafficking	2002
GABA _A receptor	Membrane receptor	2004
IP ₃ 1 receptor	Membrane receptor	2003
NeuroD	Neuronal transcription factor	2003
Kinesin light chain (KLC)	Microtubule-dependent transport	2006
Androgen receptor (AR)	Membrane receptor	2006
14-3-3	Protein trafficking complex assembly	2007
TBP	Transcription factor	2007
AHI 1	Intracellular trafficking	2008

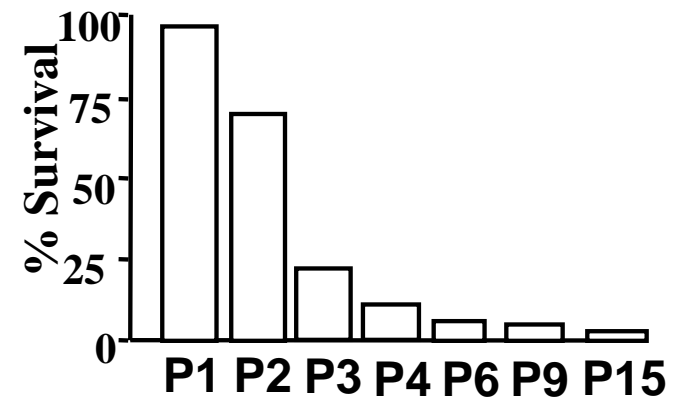

HAP1 expression in hypothalamus

P3

P10

P15

Question:

Dose reducing HAP1 expression in hypothalamic neurons in adult mice also lead to neurological phenotypes?

Approach:

Use conditional HAP1 knockout mice to examine HAP1 deficiency-related phenotypes

Orexin neurons are located in the lateral hypothalamic area (LHA) and project to almost all parts of the brain except the cerebellum

Orexin expression

HAP1 expression

Orexin neuronal function:

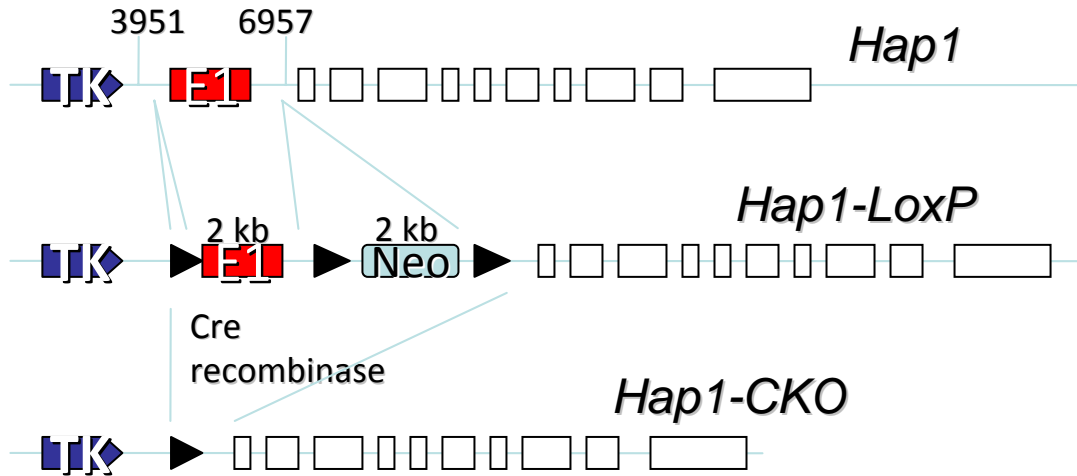

Feeding

Locomotor Activity

Sleep/wakefulness

My study focuses on orexin neurons because of their importance and availability of orexin-Cre mice

Cre-LoxP system and the Orexin-Hap1 conditional knockout mouse

Homozygous orexin-HAP1 knockout selectively depletes HAP1 in orexin neurons

Het

Hom

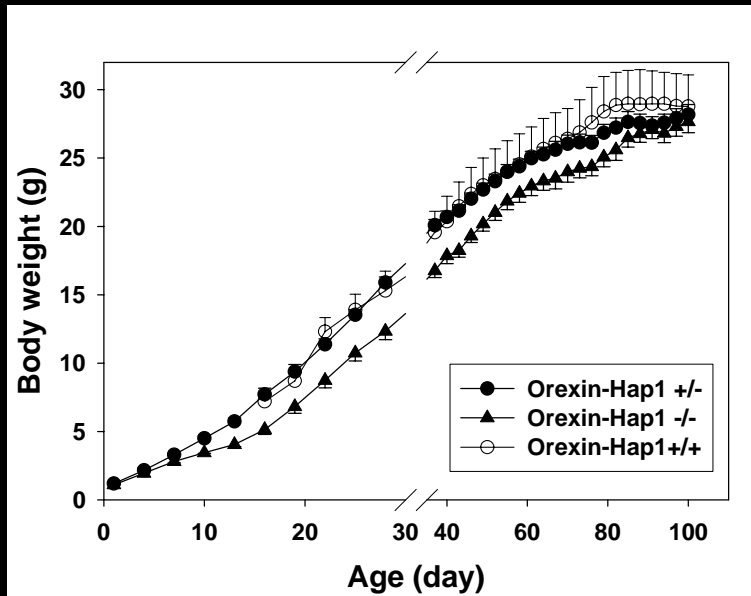

HAP1

Orexin A

Merged

Orexin-HAP1 KO mice show decreased body weight

Body weight (g)

Body weight (% of WT)

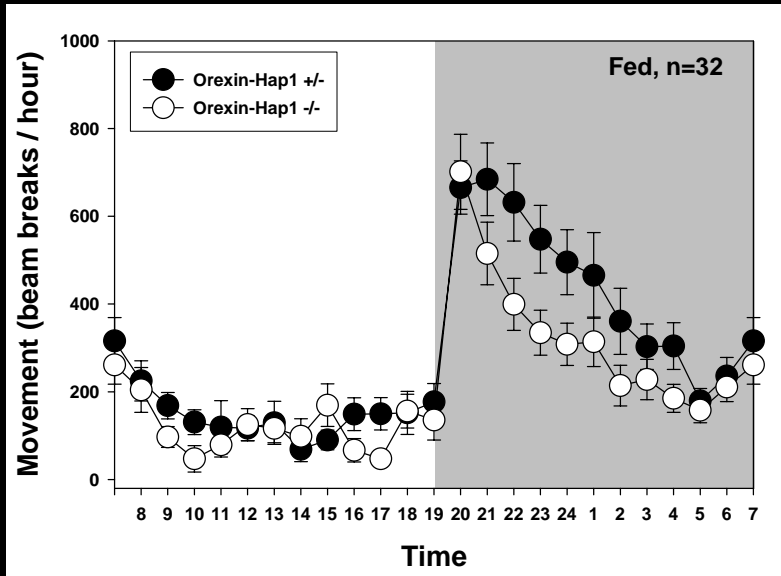

Orexin-HAP1 KO mice eat less

Food intake

Orexin-HAP1 KO mice also have lower locomotor activity

activity

HAP1 knockout reduces neurite extension of orexin neurons in mouse brain

WT

KO

Question:

Does lack of HAP1 affect neuronal intracellular trafficking in mouse brain?

Approach:

Sucrose gradient fractionation to examine the distribution of organelle marker proteins in the brains of HAP1 null and WT pups.

5 ~ 45% Sucrose

Input

Tubulin

WT

KO

Dynactin
p150

WT

KO

Kinesin
Light chain

WT

KO

Lack of HAP1 affects the distribution of lysosomes and BDNF

Conclusion

HAP1 deficiency

Intracellular trafficking defect

Impaired neurite extension

Orexin neuronal dysfunction

Feeding and locomotor activity changes
