

**NOVASYSTEM** Novasystem is the complete connection between patient and monitor. Novasystem components can be used together to form a complete pressure monitoring system or on an individual modular basis. Novasystem comes complete with the Medex  CHECK-SYSTEM™ features.

**NOVACABLE** The Medex Novacable has universal compatibility with all brands of monitors. Novacable contains the SURE-CAL™ feature of the Medex  CHECK-SYSTEM™ for reliable set-up and trouble shooting.

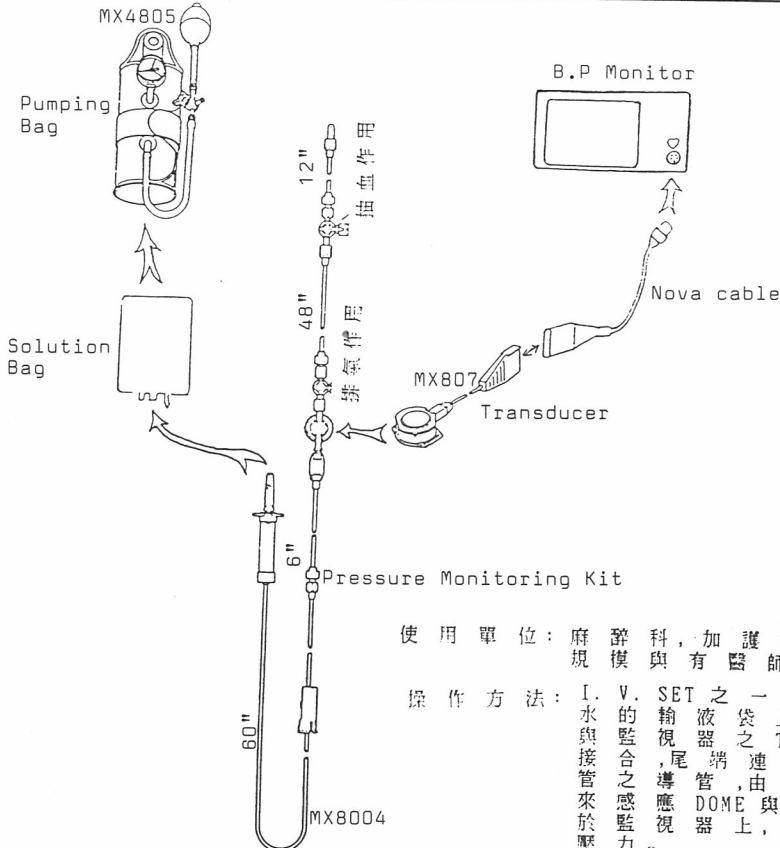

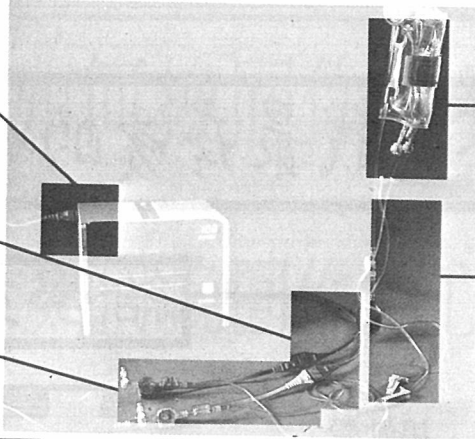

**NOVACABLE** Novacable enables use of the Medex  CHECK-SYSTEM™ for set-up and trouble shooting using the CABLE-CAL™/SURE-CAL™ combination. It is compatible with either the MX860 or MX900 pressure transducer.

**TRANSDUCER** The Medex NOVATRANS II™ and DPT are interchangeable transducers allowing a choice between reusable or disposable systems. Both contain a transducer test port for use of the Medex  CHECK-SYSTEM™ MX1000 pressure generator for a safe alternative to mercury manometer calibration methods.

**C-FUSOR™** The Medex pressure infusor bag is completely clear so that the fluid level can be seen from anywhere in the room. The Medex C-FUSOR™ bag is safe, secure, easy to use and has replaceable components.

**NOVA KIT** The Medex Novakit is a logical configuration of quality products, and therefore are easy to use. The Nova Kit is also available for an individual design preference.

**NOVAPLATE AND NOVA CLAMP** Medex's Novaplate and Novaclamp provide a functional, safe and economic set-up for the measurement system. Special custom plates are available.

使用單位： 府規 辭模 科與 加有 中護 中心 醫師 之中 但以上 較具 醫院 型醫 院。

操作方法： I. V. SET 之 一 頭 插 於 裝 有 食 監  
 操 作 方 法 之 輸 液 袋 上 有 DOME 之 接 頭 ( 感 應 頭 )  
 水 的 輸 視 尾 端 連 接 病 人 血 管 之 壓 力 示  
 之 監 視 管 由 病 人 血 管 置 於 壓 示  
 器 上 為 病 人 之 血 壓

**PRESSURE MONITOR KIT**

**動脈壓監視組套**

前 言：  
 為 更 精 確 監 測 病 人 開 刀 中  
 加 護 計 劃 治 療 中 的 血 壓 情 況 而  
 設 計 動 脈 代 替 B-P MONITOR 非 侵  
 入 性 進 步 方 法 尤 重 症 加 護 有  
 險 手 術 之 代 替 人 員 要 。

CABLE-CAL™ simulates a properly functioning transducer while also keeping the interface cable pins free from oxidation build-up.

The MX1000 Pressure Generator provides a safe alternative to mercury manometer calibration methods. The MX1000 can simulate either a positive or negative pressure in mmHG.
